DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-41, drawn to a method for treating cachexia and tumor related disorders, classified in class 514, subclass 241 .
 - II. Claims 42-67, drawn to a method for inhibiting tumor growth and metastasis, classified in class 514 , subclass 241.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as two methods of treatment using the same compound.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the compounds of the invention are being used to treat distinct disease conditions.

One of skill in the art would note that cachexia is a condition that is not limited to the presence of tumors but to conditions such as AIDS as well; moreover, the treatment of disorders related to tumors is not analogous to the treatment of tumor metastasis nor the inhibition of tumor growth.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and the searches required for inventions of Groups I and II are so varied and numerous that they would impose an undue burden upon the examiner in charge of this application, restriction for examination purposes as indicated is proper, restriction for examination purposes as indicated is proper.
